

**INTERNATIONAL JOURNAL OF REMOTE SENSING
AND EARTH SCIENCE
(URESES)**

Information for Contributors

The international Journal of Remote Sensing and Earth Science (IJReSES) is an academic journal that collects research papers containing the results of research on the earth sciences and remote sensing. It consists of the research paper, short reports, general argument and prospect, and questions and answers. Manuscripts submitted for publication in IJReSES should convey the author's findings precisely and immediately to the reader. Authors are urged to have their manuscripts reviewed critically by colleagues for scientific accuracy and clarity of presentation. If a manuscript has more than one author, co-authors must consent to the final version of the manuscript. The copyright for all writings compiled in the journal belongs to the International Society of Remote Sensing and Earth Science (IRESES).

1. Qualifications

Contribution can be made by the member of IRESES and upon the request of IRESES

2. Manuscript

Contribution should be research papers, research papers exclusive for contribution, short reports, questions and answers, general argument and prospect, and introduction of new products. Research papers have to be unpublished and are not being considered for publication elsewhere. Authors will be asked to provide final manuscript and artwork as electronic files (MSWord for text, JPEG, GIF or TIFF for images). The manuscript should be arranged in the following order:

- (1) Title page including authors names and affiliations
- (2) Abstract
- (3) Text (including appendices)
- (4) Acknowledgments
- (5) Reference list
- (6) Figure captions
- (7) Tables
- (8) Figures

Authors should send manuscript to following mail address by electronic files:

Editorial Committee of IJReSES
Kampus Unud Bukit Jimbaran
Denpasar, Bali
Telephone/Fax: (62)-361-704605
Email: cresos@dps.net.id

3. Languages

English is the official languages for the journal

4. Preparation of the manuscript

The manuscript should be concise and easy to read. Use A4 or letter size papers and type with 12 points using Times New Roman, double spacing, and one inch or 2.5 cm margins for top, bottom, and both sides. Do not exceed the 25 lines per page limit. Authors are recommended to keep a copy of the manuscript. Please pay attention also to the following points in preparing the manuscript.

- (1) The manuscript should begin with the title, the name of the author, the author's affiliation and its address to which the correspondence can be addressed.
- (2) The manuscript for research paper should be submitted with the abstract in English of approximately 150 to 250 words.
- (3) Authors are recommended to avoid the use of illustrations and tables unless they are absolutely necessary. All illustrations should be drawn in black, for the original will be used as black copy for printing.
- (4) Monochrome pictures can be accepted for publication. Color pictures can also be accepted, providing plate-making costs are met by the author.
- (5) Illustrations and tables should be numbered according to their sequence in the text and compiled on separate sheets. Brief explanation in English should be attached to all illustrations and they are to be compiled on a separate single sheet.
- (6) A numerical formula should be clearly given in a sufficient space so as to avoid misreading symbols, e.g. X², H₂, or Greek letters.
- (7) References in the text should be like [Asanuma et al. (2002)]. The reference list should be provided in alphabetical order at the end of the text. For the style of the list, refer to the below examples:

Reference list need to provide complete and accurate information that will enable a reader to locate the original source easily. References to different types of material may require slightly different information:

Articles

Name of author or authors

Title of article

Name of periodical

Volume and/or issue number (shown in parenthesis)

Citation number for articles after 2001

First and last pages occupied by article or DOI (Digital Object Identifier)

Year of publication

Example:

Settle, E.P., G.E. Thomas, J.J. Olivero, W.F.J. Evans, D.J. Debrestian, and L. Chardon, Three satellite comparison of polar mesospheric clouds: Evidence for long-term change, *J. Geophys. Res.*, 107(D12), 4079, doi: 10.1029/2110JD000668, 2002.

Green, D.H., and M.E. Wallace, mantle metasomatism by ephemeral carbonatite melts, *Nature*, 336, 459-462, 1998.

Fung, A.T., and S.E. Haggerty, Zoning, melting, and apatite in mantle eclogites, Koidu, Sierra Leone (abstract), *Eos Trans AGU*, 74(16), Spring Meet. Suppl., 320, 1993.

Galeev, A.A., and L.M. Zelenyi, Tearing instability in plasma configurations, *Sov. Phys. JETP.Engl. Transl.*, 43, 1113-1119, 1970.

Books and Reports

Name of author or authors

Title of article or chapter (if only part of the book or report is being cited)

Title of book or report

Edition (if not original)

Report numbers

Publisher's name

City of publication

Date of publication

Example:

Field, S.W., S.E. haggerty, and A.J. Erlank, Subcontinental metasomatism in the region of Jagersfontein, South Africa, in *Kimberlites and Related Rocks*, vol.2, edited by J.Ross, Spec. Publ. Geol. Soc. Aust., 14, 771-783, 1989.

Schlessinger, W.H., Changes in soil carbon storage and associated properties with disturbance and recovery, in *The Changing Carbon Cycles, a Global Analysis*, edited by J.R. Trabalka and D.E. Richie, pp. 194-220, Spinger-Verlag, New York, 1986.

Thompson, W.B., Preliminary investigation of the electrodynamic of a conducting tether, in *Spacecraft Environmental Technology 1983*, edited by C.K. Purvis and C.P.Pike, NASA Conf. Publ., 2359, 649-662, 1985.

Papers presented at meetings

Name of author or authors

Title of paper

Meeting where presented

Location of meeting

Date

Example:

Drobowlny, M., E. Mechioni, G. vannaroni, and J.P. Lebreton, Satellite charging during the TSS-1 mission, paper presented at 2nd International Workshop on the Applications of Thethered Systems in Space, Nagashima, Japan, 1994.

(8) Authors should use S.I. units.

(9) Submission of the manuscript in the form of electric files can be accepted. We accept MSWord file only. Authors can submit by attached files to Email or CD-ROM by mail.

5. Proof reading

The first page proofs will be checked by the author. The author is not expected to make changes or additions to the text, illustrations or tables that constitute departures from the manuscripts in its accepted form.

International Journal Remote Sensing and Earth Sciences
September 2005 Vol. 2

MESSAGE FROM THE IRESES PRESIDENT AND VICE PRESIDENT

International Society of Remote Sensing and Earth Sciences (IReSES) is a scientific forum which was formed to promote ocean sciences and remote sensing through mutual and international understanding and collaboration with emphasis on fostering science interest and capability in developing countries especially in the South-East Asia region. The IReSES was established in September 2003 based on participation of individual scientists, and extended to the involvement universities, research institutions, government agencies and private institution in developing countries related to ocean and earth environmental researches.

Generally, the developing countries in South-east Asia have research priorities which should be done devotedly and intensively, among others are: 1) Research linked with the utilization of marine resources in coastal area and the sea, 2) Research linked with space management, design and construction of coastal area and marine, 3) Research linked with pollution control in coastal and marine area, 4) Research linked environmental support capacity upon construction activities, such as shrimp aquaculture pond, tourism, residential area, industrial area, agricultural, etc. IReSES is expected to contribute some of research findings for the above research priorities.

The IReSES has the main objective to promote studies of the oceans and related earth sciences, using remote sensing technology through international collaboration. The scientific topics are widely range, such as greenhouse effect, ENSO, ocean hazard, pollution, sea level rise and other climatic variability in South-East Asia, ocean circulation, ocean color, marine optics, miscellaneous oceanographic information, underwater acoustics, coastal zone management, fisheries oceanography, etc.

The society aims to provide better opportunities for scientists especially from developing countries for learning and applying the state of the art in earth remote sensing including space data, pursuing studies in underwater development, information technology, environmental sciences, exploration of marine resources, etc. The promotion is implemented through international symposium or conferences, and training courses.

The inauguration of International Journal of Remote Sensing and Earth Science (IJReSES) with this second periodical scientific journal edition I is an effective way to disseminate those scientific results among the Society members, marine scientist and other interested people. The journal also has the role for facilitating the exchange view and discussion on special topics by scientists or readers. This is in conformity with the annual international symposium conducted by IReSES which could be used as forum for scientific exchange and promotion of ocean studies with related earth sciences. It is expected that the scientists in South-East Asia and its surrounding, as well as other international scientists could use this journal as medium for disseminating research results.

Denpasar - Bali, August 2005

Prof. Yasuhiro Sugimori
President, IReSES

Drs. Bambang S Tejasukmana, Dipl. Ing
Vice-president, IReSES

Editorial Committee Preface

Dear Readers,

Welcome to the second issue of International Journal of Remote Sensing and Earth Sciences. This journal is expected to enrich the serial publications on earth sciences, in general, and remote sensing in particular, in South-East Asia countries.

The contents of this journal are particular interest to remote sensing as the tool for oceanography, marine biology, fisheries, and meteorology, but pure sciences paper on oceanography, marine biology and fisheries aspects are also welcomed. Inside this second edition, there are varieties of topics were discussed, including ocean color, marine habitat (coral reef and mangrove), pelagic fish, tidal, wave, and rice field.

This journal is intended, among others, to fill the gap of information media on remote sensing and earth sciences. This journal is also intended to encourage young scientists in Indonesia and Southeastern Asian countries as well as other countries to express and contribute their thoughts to be published in this journal. Therefore we would invite those scientists to manifest their thoughts and ideas trough research papers, short reports, introduction of new products, and other materials as stated in the information to Contributors. We are looking forward to receive your manuscript for this journal.

Prof. Bonar P. Pasaribu

Chairman of Editorial committee, IJReSES

Dr. Richardus Kaswadji

Co-chairman of Editorial committee, IJReSES
